

**To the control authorities****Inconsistency between the driving licence number specified on the driving licence and the driver qualification card issued pursuant to Directive 2003/59/EC of 15 July 2003 of the European Parliament and the Council**

When a Danish driving licence is replaced, the new driving licence is issued with a new driving licence number.

Thus, there may not be consistency between the driving licence number specified on a Danish driving licence and a driver qualification card issued by the Danish Authorities (the Road Safety and Transport Agency (*Færdselsstyrelsen*) or the Danish Transport, Construction and Housing Agency (*Trafik-, Bygge- og Boligstyrelsen*)).

It appears from the date of issue specified on the driving licence and the driver qualification card, respectively, that the driving licence has been issued subsequent to the driver qualification card. By comparing other information in the two cards – surname (item 1), first name (item 2) and personal identification number (item 4d) it becomes evident that it is the same person.

Yours sincerely

Færdselsstyrelsen

(Danish Road Traffic Authority)
